

A9950011 LED dimmable driver universal max 50W
Multi-power driver with dip-switch for output-selection
(constant direct current or 48V constant direct voltage)
Dimmable 1-10V, 100K potentiometer or Pusch button
 Prim. Voltage: AC 110V~240V 50~60Hz
 Power factor λ : =0.95 / Lmax: 0.5A
 Sec.: 350-1050mA OR 48V (see dip-switch setting)
 ta °C: -20° +50° tc °C: 80°
 Protection against overheating, short ciuigt & overloads
 Dimension L x W x H (mm): 124 x 79 x 22
 Weight: 0.2 Kg Protection: IP-20 Class II

Dip-switch setting for direct constant current output-selection

max. load:	switch no:	1	2	3	4	5	6
25W	350mA	—	—	—	—	—	—
35W	500mA	—	—	—	—	—	ON
50W	700mA	—	—	—	—	ON	ON
50W	900mA	—	—	—	ON	ON	ON
50W	1050mA	—	—	ON	ON	ON	ON

Optional:
 A9920500 3AP LED 3-way serial connection box
 A9920501 6AP LED 6-way serial connection box
 A9920515 1.5m extension cable male/female
 A9920530 3m extension cable male/female

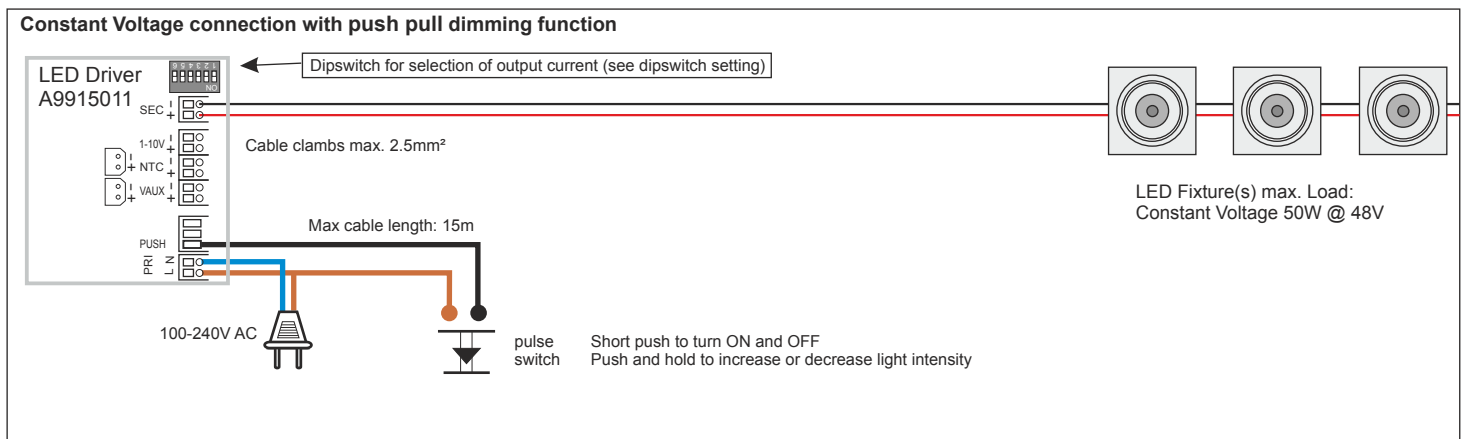

Always disconnect the mains of the LED driver before plugging or unplugging the LED's !!
 The LED's will be damaged or destroyed because of the high voltage present on the driver output when there is no load connected. **Connect the main after all LED's and plugs are connected !**

A9950011 LED dimmable driver universal max 50W
Multi-power driver with dip-switch for output-selection
(constant direct current or constant direct voltage)

Dimmable 1-10V, 100K potentiometer or Push button

Dip-switch setting for **direct constant voltage** output 48V

switch no:	1	2	3	4	5	6
48V	ON	—	ON	ON	ON	ON

Connection with potentiometer for max. 5 LED drivers

Max. 10 drivers can be controlled by one potentiometer

Max cable length from potentiometer to last driver must be max. 15m !

- | | | |
|-----------------|-----|----------------------------------|
| 1 LED driver: | use | 100k logarithmic potentiometer |
| 2 LED drivers: | use | 47-50k logarithmic potentiometer |
| 4 LED drivers: | use | 25k logarithmic potentiometer |
| 10 LED drivers: | use | 10k logarithmic potentiometer |

Connection with pulse-switch for max. 10 LED drivers

Push button (Pulse switch) function

By pressing the push button for less than one second the LEDs turn on or off. By pressing the push button for more than one second the light intensity of the LEDs is dimmed according to the following modalities:

- If the light intensity is not at maximum, by pressing the key there will be an increase of this to maximum or to the corresponding level at the moment the key is released.
- A further pressure on the key inverts the dimming direction to the minimum value or to the corresponding level at the moment the key is released.
- If light intensity is at maximum by pressing the key there will be a decrease to the minimum value or to the corresponding level at the moment the key is released.

Function synchronization during dimming of more than one ballast is possible by means of the sync gates. In this way there is the same light intensity (with the same connected led load) among all the connected ballasts.

This possibility is highly recommended when more than one ballast needs to be controlled by one push button (see the diagram).

N.B.:

The use of the push button inhibits the use of the 1...10 V signal. To return to use of the 1...10 V signal keep the signal less than 0,5 V for at least 2 seconds.

Dipswitch settings

max.Load	SEC	Dip-switch no.:					
		1	2	3	4	5	6
25W	350mA	—	—	—	—	—	—
36W	500mA	—	—	—	—	—	ON
50W	700mA	—	—	—	ON	ON	ON
50W	900mA	—	—	ON	ON	ON	ON
50W	1050mA	—	ON	ON	ON	ON	ON
50W	48V	ON	—	ON	ON	ON	ON

LED Fixture(s) max. Load:

Constant Current:
 350mA max. load: 25W
 500mA max. load: 35W
 700mA max. load: 50W
 900mA max. load: 50W
 1050mA max. load: 50W

Constant Voltage:
 48V max. load: 50W
