

Capture viewers by adding live video playback to BrightSign digital signs.

The BrightSign Live Video Module enables any broadcast TV or streaming video source to be played back through BrightSign digital sign controllers. The live video playback can be easily mixed in with recorded video and images to create a unique viewing experience that specifically targets your audience. Draw attention to your display with relevant, live video content and increase the viewing of your messaging with this simple plug-and-play solution.

Features

- Allows BrightSign to playback standard definition live video as a content source
- Mixes live video playback with standard recorded content including digital video and still images
- Supports any broadcast TV or other SD live video feeds
- Displays live video in multi-zone or full screen layouts with other content sources playing with and around it
- Provides adjustments for brightness, contrast, saturation and hue of the input video
- Compatible with BrightSign HD810 and HD1010 models
- Offers S-Video and Composite video inputs with support for NTSC, PAL and SECAM
- Requires no external power source - the module is connected and powered by a USB connection
