

SC-24

ORDERCODE D1524

SHOWELECTRONICS FOR PROFESSIONALS

SC-24 Stereo Di-box / Hum Eliminator

The SC-24 is designed to eliminate groundloops.

The unit has two XLR input connectors and two XLR output connectors.

These inputs/outputs are transformer coupled to avoid groundloops.

1. Output 1

Connect this output the input channel of your destination device (eg. amplifier, processor etc.).

2. GND/Open/Res switch

This switch has 3 positions:

- GND: The ground is connected.
- Open: In this position the ground is lifted.
- Res: In this position the ground is connected through a resistor.

In case of hum, you have to try which position fits your situation best.

3. Output 2

Connect this output the input channel of your destination device (eg. amplifier, processor etc.).

4. Input 1

Connect this input to the output of your source device (eg. mixer, processor etc.).

5. Input 2

Connect this input to the output of your source device (eg. mixer, processor etc.).

SC-24 Stereo Di-box / Hum Eliminator

Input: XLR 3 pole female

Output: XLR 3 pole male

Input Impedance: 10 K Ω

Output Impedance: 10 K Ω

Dimensions: 115 x 75 x 40 mm (LxWxH)

Weight: 200 g
